**Miss Gill-Caterlain.**  
The home of Mr. and Mrs. E. C. Gill, No. 2010 Pleasant Street, was the scene of a gay party Tuesday evening, when their daughter, Miss Adell Gill, entertained in honor of her friends, Messrs. Willie and Arthur Wilson, Jack Atchison and Charles Carrier, of Boston, Mass.

**TRIED TO FORCE IT**  
Thought System Would Soon Tolerate Coffee.

A Boston lady tried to convince herself that she could get used to coffee, and finally found it was the stronger. She writes:

"When a child, being delicate and nervous, I was not allowed coffee. But since reaching womanhood I began its use, and as the habit grew on me, I frequently endeavored to break myself off in because of its evident bad effects."

"With me the most noticeable effect of drinking coffee was palpitation of the heart. This was at times truly alarming, and my face would flush uncomfortably and maintain its vivid hue for some time."

"I argued that my system would soon accustom itself to coffee, and continued to use it, although I had a suspicion that it was affecting my eyesight, also. The kidneys early showed effects of coffee, as I found by leaving it off for a few days, when the trouble abated."

"Finally a friend called my attention to Postum. At first I did not like it, but when made right, it did fifteen minutes until dark and I found Postum was just what I wanted. No flushing of the face, no palpitation, no discomfort or inconvenience after drinking it."

"Of course all this was not felt in a week or two weeks, but within that time I can truthfully say a marked difference had taken place, and a great deal of my nervousness had vanished."

"At present time my health is excellent, due to the general observance of proper hygiene. Of nothing am I more convinced than that if I had continued drinking coffee, I should be to-day little less than a nervous wreck, and possibly blind."

"There's a Reason."

Mr. C. W. Throckmorton has gone to Lexington to enter his son, Robert, at the Virginia Military Institute.

Did not ask you to come here," he said, "I shall go out when I'm ready. No, I shall not try and mislead you newspaper men, you are not here to wait for you."

When, however, exasperation became acute the general, Mr. Hart O. Berg, who is responsible for the flight, said that he would come out of the shed and tell some amusing story about his principal that would put us in a good humor about it.

There was another man there, too, who had an unbounded belief in him, and this was M. Leon Bollee, the well-known motor mechanic and inventor in the Bollee works that Wilbur Wright had for six weeks been laboring at his aeroplane, fitting it together.

"I believe," said Bollee, "to be a marvel of inventive genius. I have watched him and studied his machine, and I am convinced that he will succeed in his many crude little points in it, it is the most perfect instrument of flight known up to the present time."

Mr. Wright meted the machine, and will not listen to any suggestions which would save him endless trouble and make it a failure. He has no ball bearings on his propeller shafts. I pointed out to him that if he used these instead of the steel rods, he would save a great deal of oiling, but he would have none because he was unable to make them himself. He would not have those we make."

And, with good reason, has the reputation of being one of the most skillful mechanical engineers in France, went on to explain to me the reason why Wright's habits. "While in the works he worked away at his apparatus from 6 A. M. till midnight. He would come in with the stars and when the factory whistle sounded he would immediately drop whatever he had in hand, take off his overalls, and go out to dinner with his family. He does not smoke, he never drinks, he eats sparingly, and the ordinary recreations of life do not appeal to him. Such is the man," concluded Mr. Bollee, "he is a hurr, he will not allow anybody to touch his machine or handle so much as a piece of machinery. He pours oil into his reservoir. In his opinion, they don't do it the correct way."

**Spartan Stimulency.**  
During the long hours of waiting I watched Mr. Wright in his shed. In a corner of the shed, a low packing case, from which the top had been removed, resting on the edges of the packing case was a narrow table, on which sat a lamp, a glass, and a piece of looking-glass, and close by a camp washstand. This, together with a camp stool, a camp stool, and a camp stool, comprised the whole furniture. He takes his baths from a hose-pipe attached to a wall sixty feet

high. While teaching Giffard at the Putnam Military School he became almost a rheumatic cripple, and came here for the benefit of his health, which had been entirely restored. Since coming here he has been engaged in the real estate business, organized the Burkeville Board of Trade, which has promoted the growth of Burkeville. In the last three years, served in the Town Council, edited the Burkeville Free Press for two years, and is now engaged in the printing business. His wife was the widow of George L. Latham, of Chicago, one of the founders of the firm of Boyd & Latham, of Chicago and Cork, Ireland.

Mr. and Mrs. Dahlborn will be at home here after September 9th.

**Wilbur Wright, the Fanatic of Flight, Who Was "Born to Soar"**

Joseph Brandreth, in the Paris edition of the London Daily Mail, had the following to say of his impression of the man who, the famed American aeronaut.

The man who walked out of the rough wooden shed to meet me wore a cloth cap and was in his shirt sleeves. He had a long, thin face, a curious deep green color, such as I do not remember ever to have seen before. As he advanced with a long, lurching, jerky gait he kept his hands thrust into his trousers' pockets and whistled a tune of no particular melody. Then, as he walked, he made the tall, gaunt figure of the man who, the famed American aeronaut.

There was something strange about the tall, gaunt figure of the man who, the famed American aeronaut.
